Builders Commentary

After over seven million nautical miles of documented ocean crossings, Nordhavn has set records that will never be challenged – except maybe by other Nordhavns.

The venerable Nordhavn 40 holds the world record for the fastest circumnavigation by a production powerboat. How do you top that? Our answer: use all of our experience and start from scratch, make no compromise, spare no expense, employ the latest design technology and incorporate the world’s most advanced Computational Fluid Dynamics analysis to produce the most capable, efficient, safe and sea-kindly Passagemaker ever built. We call it the all-new Nordhavn 41.
