## Builders Commentary

The 250BR is the latest addition to the growing line up of bay boats. With the added floor space you can add the spacious lounge seat upfront which features a huge storage area underneath. This box is insulated and macerated to serve as a fish box or ice chest, depending on the needs of the day. Under this fish box, and accessible from under the console is spacious enough to store 3 troll motor batteries and even a freshwater tank, leaving the space under the console open for a porta-potty or changing room. With all batteries stored in the console, you have open storage under the jump seats in the rear as well. Sidewall rod storage can hold fly rods over 9' long even without using the rod tubes. This big bay boat has more rod storage than anything in its class and performs great with a 250 hp engine, or more.

## Layout
