Builders Commentary

At 24 feet, the biggest boat in the Axis line produces the best wakes and waves on the water for under \$100k* so your summer just got a lot bigger and a lot more fun. With seating for 17 the A24 leaves no one at the dock while it carves out perfectly formed sets of endless glassy swells. The 2020 A24's inside lounge provides the ultimate comfort, including the Rear-Facing Sliding Skybox Seat and ChillAx seat backs that give passengers even more options to face the action.

Standard Features

FIBECS

Our patented FibECS chassis and eight-layer lamination process provide maximum durability and ensures a smooth, solid ride on the water.

WAKE-PLUS HULL

Designed specifically for boarding applications, this hull design allows the boat to sit deeper in the water at slower speeds, helping create more water displacement for a bigger wake at all boarding speeds.

GORILLA FINS

We use gorilla fins with 120 square inches of surface area; not only is the size important but the placement on our models is much further forward than others. This fin maximizes tracking ability, quicker handling and better control.

MULTI-POSITION SLIDING SKYBOX SEAT

The optional Multi-Position Sliding SkyBox seat gives your crew the stadium seating to watch all the rider action. The removable back-rest are easily stowed under the swim-deck when not in use.

MALIBU MONSOON M5DI & M6DI ENGINE

New for 2020, you can power you AXIS with a Malibu Monsoon M5Di or M6Di Engine giving you the ultimate reliability, power, fuel efficiency, and noise reducing time on the water.

OPTIONAL POWER WEDGE III

Axis now offers the Power Wedge III as an option. Now, just push a button to adjust the wake with ease and control that competitors can't match producing the equivalent of 1,500 lbs of ballast.

SURF GATE

Wait until you see how easy it is to turn the wake into an endless, customizable wave for surfing. Push a button to activate Surf Gate™. That's it. The Surf Gate's high-speed hydraulic actuators let you quickly shift the wave from side to side.
